Welcome to our sale!

Hello fellow beef producers,

Welcome to our annual bull sale March 9, 2024. We hope this year finds all of you doing well and enjoying the terrific market the beef industry is experiencing. It is nice to be getting rewarded for the hard work that goes into raising and supplying a wholesome, nutritious food product for our nation's population. Hopefully the trend continues and we can all prosper.

Every year we work to achieve our goal of raising bulls that are easy calving and functional while maintaining growth and productivity. We believe these bulls balance those traits in attractive packages. We want these bulls to be productive and profitable for you. As always, our cattle are raised without the aid of creep feed or special treatment. The bulls are developed on a 16% protein grower pellet and grass hay. This is a ration designed to grow them out but not get them overly fat. We feel this helps them maintain good feet and body condition when they go to work.

Thank you to all of you who have supported us in the past! We are so humbled that you have placed confidence in our genetics and allow us to have an impact on your program. It is important to us that we have a positive impact and we want to keep moving forward in the beef industry.

All bulls have passed a breeding soundness exam and will be available for viewing here at the ranch until the day of the sale. You are welcome to stop in and see them anytime. Visit our website, Facebook page, or CattleUSA.com for videos of the bulls. Stay warm and happy calving! We hope to see you at our sale on March 9th.

Thank you again and best wishes,

MTR Cattle Co.

We purchased Remington in the 2016 Schaff Angus Valley sale. It was a decision we have never regretted. Remington has had a very positive impact on our herd and his females are some of our best cows. Although there is only 1 son in this sale he is the grandsire to 18 of these bulls. That says something about the productivity of his offspring. We lost Remington due to injury but will continue to use him in the future through AI and make more of the great females he has left behind.
