# Welcome to our sale!

Hello fellow beef producers,

Welcome to our annual bull sale March 8, 2025. What a unique time to be in the beef industry. As we experience record high cattle prices it is rewarding to be compensated for the hard work that goes into raising and supplying a wholesome, nutritious food product for our nation's population. Hopefully the trend continues and we can all prosper.

Every year we work to achieve our goal of raising bulls that are easy calving and functional while maintaining growth and productivity. We believe these bulls balance those traits in attractive packages. We want these bulls to be productive and profitable sires. This pen of bulls shows the right traits to do just that. As always, our cattle are raised without the aid of creep feed or special treatment. The bulls are developed on a 16% protein grower pellet and grass hay. This ration is designed to grow and develop the bulls, but not get them overly fat. We feel this helps them maintain good feet and body condition when they go to work.

Thank you to all of you who have supported us in the past! We are so humbled that you have placed confidence in our genetics and allow us to have an impact on your program. It is important to us that we have a positive impact and we want to keep moving forward in the beef industry.

All bulls have passed a breeding soundness exam and will be available for viewing here at the ranch until the day of the sale. You are welcome to stop in and see them anytime. Visit our website ([mtrcattlecompany.com](http://mtrcattlecompany.com)), Facebook page (MTR Cattle Company), or [DVAuction.com](http://DVAuction.com) for videos of the bulls. Best wishes for a prosperous year and we hope to see you at our sale on March 8th.

Thank you again and best wishes,

We purchased Remington in the 2016 Schaff Angus Valley sale. It was a decision we have never regretted. Remington has had a very positive impact on our herd and his females are some of our best cows. Although there are no sons in this sale he is the grandsire to several of these bulls. That says something about the productivity of his offspring. We lost Remington due to injury but will continue to use him in the future through AI and make more of the great females he has left behind.

# Commercial Yearling Heifers

## 14 Commercial Angus and Balancer®/ Percentage Yearling Heifers

This is our first time offering females in our annual sale. Selected from our 2024 replacement heifer pen, they are sired by the same group of sires as the bulls in this years offering. We expect them to make very productive females. The heifers are gentle, bunk broke, bangs vaccinated and wormed. They are ready to head into the breeding season and go to work. These heifers will be sold as commercial without papers.
